Build Knowledge Graph

Machine Learning   Posted Aug 24, 2023

I am looking for a talented developer to build a knowledge graph using Neo4j for a given website. Essentially, the steps should follow the ones in the article - https://towardsdatascience.com/analyze-your-website-with-nlp-and-knowledge-graphs-88e291f6cbf4 . Sample code and Jupyter notebooks are available there.

Technology-wise - I'm looking for a self-contained solution so ideally everything should be Dockerized. The final deliverable should spin up Jupyter and Neo4j containers and should be able to be run on the Notebook itself

How do you want to be paid?

○ By milestone

Divide the project into smaller segments, called milestones. You'll be paid for milestones as they are completed and approved.

○ By project

Get your entire payment at the end, when all work has been delivered.

How many milestones do you want to include?

1 Description

Cover Letter

Attachments

Drag or **upload** project files

You may attach up to 10 files under the size of **25** MB each. Include work samples or other documents to support your application. Do not attach your resume — your Upwork profile is automatically forwarded to the client with your proposal.

Boost your proposal (optional)   Learn more

Bid for one of 4 boosted spaces at the top of the client's proposal list.

How bidding works   BETA

- **You'll be charged your bid** if the client interacts with your proposal, or you're one of the top 4 bidders by the time the auction closes.
- **You'll be refunded your bid** if you're outbid from the top 4 slots before the client interacts with your proposal.
