Job details

Graph Database Neo4J Specialist

Database Development   Posted Aug 15, 2023

We will first work on a test project on attendance to workshops and classes from a .csv file. If we work well on this project, we will connect to an sql database and work on other graph analytics projects.

The skills required for this are to be able to:

- Design, build, and maintain scalable graph database solutions using Neo4j.
- Collaborate with my team to gather and refine requirements for data projects.
- Ensure database performance by optimizing queries, designing efficient data models, and leveraging appropriate indexing.
- Provide insights and suggestions based on graph data analysis.
Monitor Neo4j databases for performance, security, and other issues and apply patches or updates as needed.
- Document designs, architectures, and processes for future reference and for team members.
- Stay current with the latest trends, techniques, and best practices in the Neo4j and graph database community.
- Integrate Neo4j with other systems and platforms, ensuring data consistency and reliability.

Required Qualifications:

- 3+ years of hands-on experience with Neo4j or other graph databases.
- Proven ability in designing and implementing effective graph database structures.
- Strong knowledge of Cypher query language.
- Experience in integrating Neo4j with other platforms and systems.
- Excellent problem-solving skills and ability to handle complex data challenges.
- Strong communication and teamwork skills.

Other qualifications:
Preferred Qualifications:

- Certification in Neo4j or a related field.
- Familiarity with [other relevant technologies, e.g., "Python, Java, GraphQL, etc."
- Experience in working with large-scale graph databases in production environments.
- Understanding of data privacy and security principles.
